

1. Game Basics

- **Game Name:** Sort Express!
 - **Genre:** Casual Puzzle
 - **Sub-Genre / Mechanics:** 3D Match / Goods Sorting
 - **One-Line Description:** A 3D in-app purchase focused sorting game where players organize items on shelves to clear them.
-

2. Core Gameplay (MOST IMPORTANT)

Main Player Action

- **Action:** Sorting and matching 3D in-game items (e.g., drinks like coffee, orange juice, milkshake, cola) on shelves.
- **Goal:** Match 3 identical objects to clear them from the shelf.
- **Reward:** Progressing through levels and potentially earning in-game rewards/currency.

Win / Lose

- **Win when:** All items on the shelves are successfully matched and cleared.
 - **Lose when:** Shelves become too full to move items, or time/move limits are reached (typical for this genre).
-

3. Key Rules (Do / Don't)

Must Have

- **Close-up Item Views:** Gameplay ads must show in-game items up close (e.g., 8x3 layouts) for stronger performance.
- **Dynamic Elements:** Include concepts like breaking shelves or moving shelves to add "glow" to original gameplay.
- **Concept Variety:** Use diverse themes such as shoe closets, dishwashers, and various backgrounds.

Must NOT Have

- **Low-Quality Visuals:** The client is highly focused on quality alignment and detailed feedback to avoid repetitive errors.
-

4. Player Motivation

- **Skill / Mastery:** Getting better at quickly identifying and sorting items.
 - **ASMR:** The satisfying visual of items clearing and shelves "breaking" or moving.
 - **Progression:** Moving through increasingly complex levels.
 - **Player Feeling:** Smart / Calm
-

5. Progression Snapshot

- **What grows over time?** Level complexity, variety of items, and potentially map or collection elements.
 - **Main currency:** In-app purchase focused (specific currency name not mentioned).
 - **Main upgrade:** Likely power-ups or shelf expansions typical of the "Goods Sorting" genre.
-

6. Visual & Creative Direction

- **Art Style:** 3D Stylized (specifically mentioned as a "3D game" unlike direct competitors).
 - **Tone:** Casual / Fun / Organized.
 - **Camera:** Side-on / Front-facing view of shelves.
-

7. Game Rules

- Match 3 items to clear them.
 - Items can be moved between shelves if there is space.
 - Specific "triggers" for playables include time-based, click-based (after 3–5 clicks), or interaction-based (after matching 3 objects).
-

8. Links & References

- **Gameplay Video Reference:** Top successful ads include #109, #46, #87, and #99.
 - **Assets Folder:** [Marketing Assets Drive](#)
 - **Best Creative Example:** Ad #99 (Breaking shelves) and Ad #46 (Dishwasher theme).
-

9. Ideation Directions

- **Exploration Level:** High (Client encourages AI-generated concepts and hooking intros).
- **Are we allowed using AI generated assets? Yes** (AI-generated characters, intros, and "misleading" narrative hooks like a mom angry about messy toys are encouraged).
- **Competitors:** Goods Sorting (Goods Puzzle Sort Challenge / Goods Sort Matching Puzzle).
- **Target Audience:** 90% women, 35+ years old (similar to Match Factory profile).
